Toxic Gas Sensors – For Immediate Release – September 1, 2004

The sensor is a key element in any instrument product line and having a superior sensor from a reliable supplier insures long-term success.

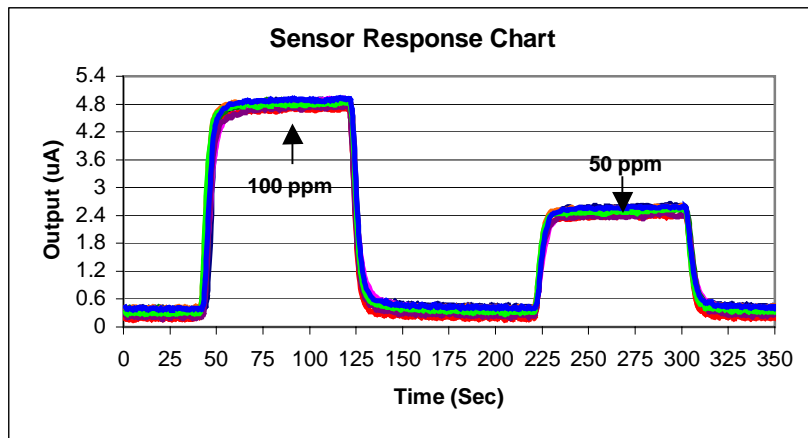

Need Performance? Need reliability? Need Compatibility?
Choose TTI SENSORS!

Transducer Technology Inc. has newly released a breakthrough line of **nano-technology** enabled **toxic gas sensors**. These will offer positive benefits for your products and your customers.

The new sensors have a wide range of compatibility with existing and new applications for toxic gas measurement.

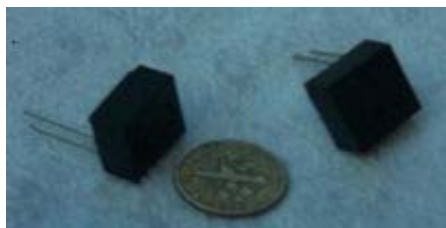

Outstanding Features:

- Exceptional ruggedness
- Fast response
- Long-term stability
- Long lifetime
- Ultra low power

- Basic design has proven **reliability** for more than 10 years in field use.
- TTI is an industry veteran with more than **30 years experience** in sensor engineering.
- Extremely **low cost** production is possible for high-volume applications.
- Easily customized production creates **flexible design** options for your products.

What can the TTI sensors can do for your existing products and your future?
Call our sensor engineers today! 510 791 0951 – www.transducertech.com

Sensor response is fast, smooth, uniform, linear, reversible, and stable.
